

# String: NextGen blockchain for global digital securities

String is the first of its kind end-to-end encrypted blockchain. String facilitates protocols for creating private accounts, private transactions, private NFTs, while maintaining a public chain. String is capable of providing 1:1 decentralized regulatory access through its encryption technology and structure. In this way, we can facilitate the needs for decentralized finance and traditional finance, while maintaining decentralization and privacy.

## String User Interface

String: NextGen  
blockchain for  
global digital  
securities

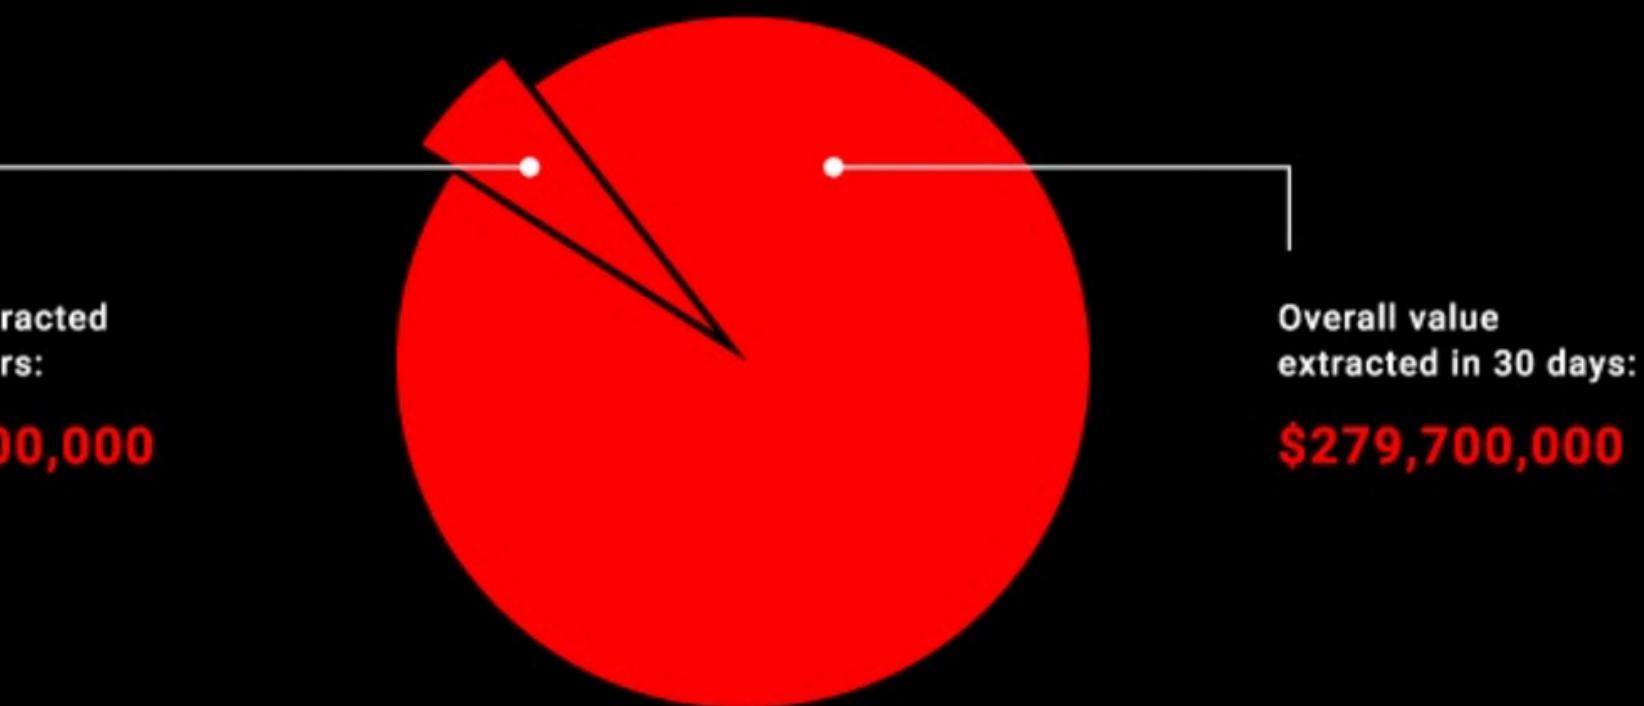

# TOP DEX PLATFORMS BY TOTAL EXTRACTED VALUE

# YOUR DATA.

- export\_blocks\_and\_transactions
- export\_token\_transfers
- export\_receipts\_and\_logs
- extract\_token\_transfers
- export\_contracts
- export\_tokens
- export\_traces

# LOSSES CAUSED BY FRONT RUNNERS TO DEX TRADERS

# EXTRACTED VALUE BY MEV TYPE

# Our Sauce

## ENCRYPTION

- We are the WeChat of blockchain.
- We feature end-to-end encryption for all your accounts, transactions and smart contract data while maintaining a public chain.

## SIMPLE

- Easy to use blockchain. Win because you understand the system.
- Protect your wallet and privacy. Hold and trade your existing assets.
- Single use interfaces, *Ex. in first slide*

## DIGITAL SECURITIES

- We work with both decentralized finance assets and traditional finance assets.
- Permissioned regulatory operations on our network

# Nerd Speak (f\*\*\*ng tite)

## MFHE

With the Multi-key  
Palliar scheme, we can  
perform addition on a  
set of encrypted  
numbers within the  
node. We use this to  
process transactions  
while maintaing  
privacy

## PRE

Proxy Re-encryption  
allows us to pass any  
data trustlessly  
between nodes.

## POLYGLOT

Language agnostic  
development  
environments.

# Competitive advantage

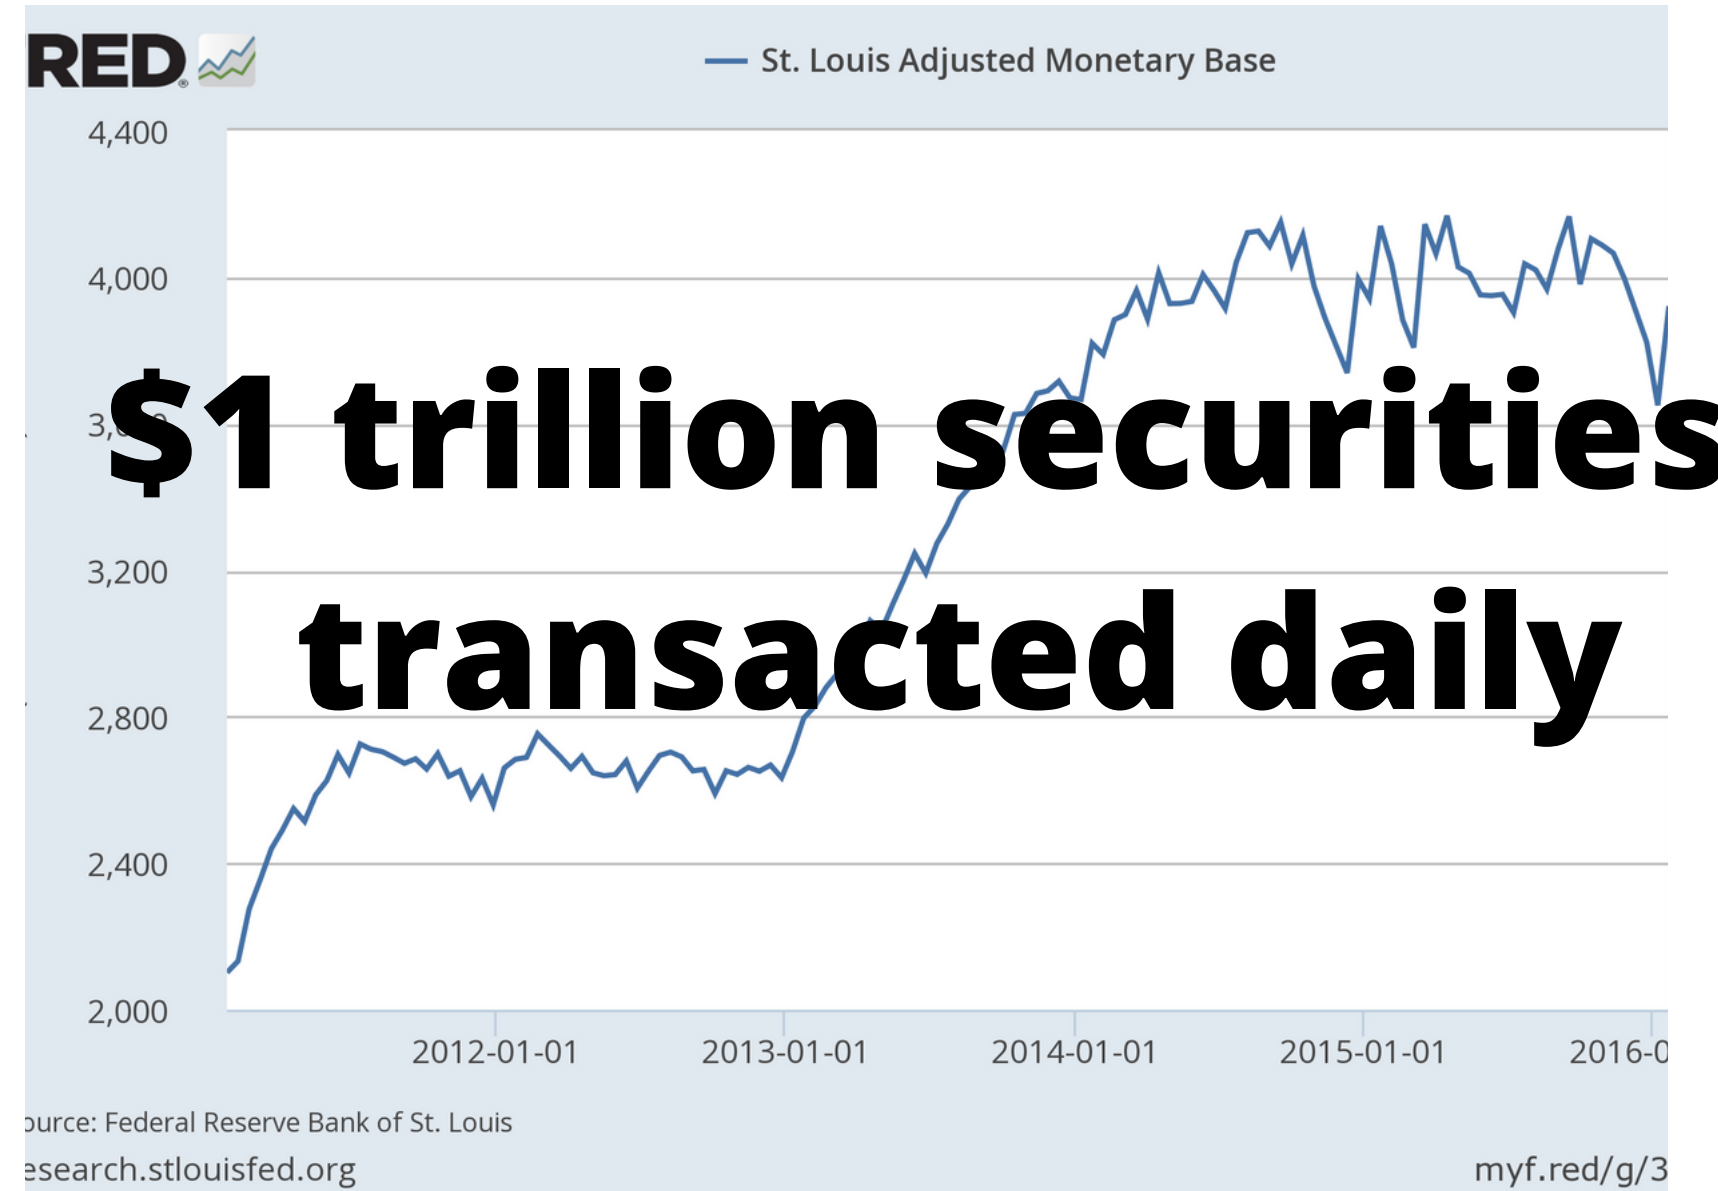

## FIRST TO MARKET

With its privacy tech, String is the first pure blockchain able to facilitate traditional finance (tradFI) processes within a decentralized blockchain environment.

# Protocol: STO-25

Security Token Offering for global securities. The new ERC-20.
